

# SOLAR CARPORTS LLC

## Design thru Installation

Solar Carports LLC is a specialist in the design and installation of structural canopies to support solar power systems. With prompt integration, unsurpassed durability, fewer maintenance issues and affordable customization, you can feel safe with a Solar Carports integrated solution.

- ❖ Our structures are manufactured in America with US Steel. With manufacturing facilities in both California & Virginia, we reduce your shipping time and cost to the project site.
- ❖ Our structures can be seamlessly retrofitted to an existing carpark. Or we can work on your new developments.
- ❖ Our unique solutions will maximize your available space to provide the highest amount of solar power per square feet available.
- ❖ We will work with you to get the best overall cost per installed watt.
- ❖ You decide the finishes – from water tight canopies; gutters and downspouts; LED canopy under lighting; to galvanized or painted finishes.
- ❖ We will get you up and running in super quick time – with multiple pre-engineered designs; or work with you on custom canopies as required.

### OUR SERVICES

- Design solutions
- Engineering
- Installation
- Financing

# SOLAR CARPORTS<sup>LLC</sup>

With our uniquely vertical supply chain, we will bring your project in on schedule and on budget. Our carports are designed to be robust for the climates they live in – Up to 150 mph wind zones and high snow loads. Select from our pre-engineered designs, or consult with us on your custom requirements.
